

Docket No. RSW920030266US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR GENERATING DATA FOR USE IN
MEMORY LEAK DETECTION**

5

A method, apparatus, and computer instructions for collecting data for analyzing memory leaks. A plurality of indicators are associated with a plurality of objects. The plurality of indicators are set to a first state. An indicator is set for each live object in the plurality of objects to a second state. In response to a request for the data, data is collected from all objects in the plurality of objects having indicators set to the first state.
